Stellent Content Server 7.1

Web-Based Training

Stellent Web-Based Training is a learning tool that teaches users the fundamentals of contributing and using content in a Stellent environment. It uses a simulation of Stellent Content Server, which offers consumers and contributors a chance to experiment without risk. In addition, it provides feedback and hints to aid in the learning process. The main topics include:

- accessing Stellent Content Server,
- finding content,
- viewing content,
- managing resources, and
- managing content.

The module concludes with a quiz to test learners' knowledge of Stellent consumption and contribution. This training module is available in English, French, German, and Spanish.

For more information, contact your local Stellent representative or visit the Stellent website at <http://www.stellent.com>.
